

SKAWINSPECTION

THE SWORN WEIGHER, MEASURER & SAMPLER OF SKAGEN

> Weighing and measuring > Sampling > Tally > Inspection and check > Draft and bunker survey > Other services

SKAWINSPECTION offers inspection services

SKAWINSPECTION's inspection area is mainly local, but we're ready to operate all over Denmark.

All inspections performed are recorded by our professional, competent inspectors. This helps to underline our professionalism and full impartiality in every respect.

There are no limits....

SKAWINSPECTION has developed its professional skills and optimised its procedures over many years to match the individual inspection tasks.

On receipt of a written, detailed order, SKAWINSPECTION is ready to look after your interests.

SKAWINSPECTION's inspection services include:

- Weighing and measuring
- Taking samples and sending them to laboratories in accordance with the client's requirements
- Tally
- Inspection, checking and sealing of export shipments
- Draft and bunker survey in connection with shipping of loose and liquid goods
- Other services, including stocktaking in connection with business transfers, auditing and inventories for insurance companies

SKAWINSPECTION's inspection services ensure that the client has:

- impartial and independent delivery of services
- delivery according to our own quality control system with written procedures
- delivery when it suits the client
- documentation of the service in an inspection report
- internal quality control performed by an internal auditor
- professional, skilful and experienced inspectors
- 100% reliable data
- inspection reports which are valid throughout the EU and in large parts of the rest of the world

SKAWINSPECTION is the impartial intermediary between buyer and seller

is accredited under the
DS/EN ISO/IEC 17020
standard by:

SKAWINSPECTION
performs accredited
inspection tasks:
Weighing - Measuring
Sampling - Inspection
- Tally.

Since 1999, SKAWINSPECTION, previously Weigher, Measurer & Sampler of Skagen, has been performing a wide range of different inspection services, and today the company has a central location in Skagen Harbour. In 2015, we've expanded our activities by establishing a branch in Hanstholm.

Our office offers a direct view of Skagen Roadstead, where thousands of ships call into port every year. Our daily place of work is of course Skagen Harbour and Roadstead, and our inspectors are able to get to Skagen Roadstead on very short notice.

SKAWINSPECTION has its own weighbridge, a range of weight units and other calibrated equipment. Our work is often carried out in a close partnership with accredited laboratories.

SKAWINSPECTION's inspection area is mainly local, in Skagen and Hanstholm, but we're ready to operate all over Denmark.
